

- 36** The diagrams show the result of incubating two species of bacteria, P and R, on separate Petri dishes each containing nutrient agar.

Three filter paper discs have been added to each Petri dish.

Which statement is correct?

- A** Antibiotics X and Y are resistant to bacteria P.
- B** Bacteria P are resistant to both antibiotics.
- C** Bacteria R have a mutation that makes them resistant to antibiotic Y.
- D** N is a control disc showing bacteria R grow when antibiotic Y is not present.
