

10 (a) Fig. 10.1 shows the structure of two guard cells.

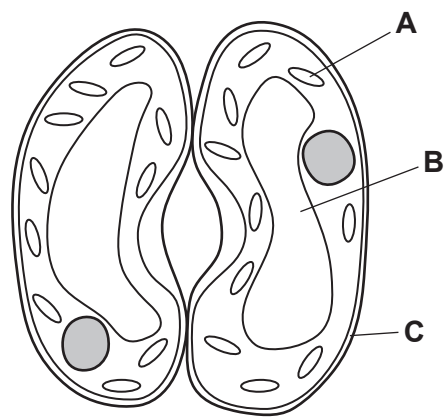

Fig. 10.1

Name the structures labelled **A**, **B** and **C** in Fig. 10.1.

A

B

C [3]

(b) In times of water stress, abscisic acid is released. This results in the closure of stomata to reduce water loss by transpiration.

Describe the role of abscisic acid in stomatal closure.
