

2 Which equations correctly show the relationship between magnification, image size and actual size in microscopy?

1 $\text{magnification} = \frac{\text{image size}}{\text{actual size}}$

2 $\text{magnification} = \frac{\text{actual size}}{\text{image size}}$

3 $\text{actual size} = \frac{\text{image size}}{\text{magnification}}$

4 $\text{actual size} = \frac{\text{magnification}}{\text{image size}}$

A 1 and 3

B 1 and 4

C 2 and 3

D 2 and 4
