

- 3 The diagram shows a stage micrometer, with divisions of 0.1 mm, viewed using an eyepiece graticule.

Pollen grains were grown in a sugar solution and viewed using the eyepiece graticule.

Diagram 1 shows the pollen grains at the start. Diagram 2 shows the pollen grains after 4 hours.

What is the growth rate of the pollen tubes?

- A** $5 \mu\text{m h}^{-1}$ **B** $10 \mu\text{m h}^{-1}$ **C** 5 mm h^{-1} **D** 10 mm h^{-1}
