

Answer **all** questions in the spaces provided.

0 1 . 1

Littorina littorea is a species of snail found on rocky sea shores.

A student investigated variation in snail shell height in two populations of snails.

Give **two** ways in which the student could ensure his samples would provide a reliable measure of the variation between individuals in each population.

[2 marks]

1 _____

2 _____

0 1 . 2

The student could determine the median, mode and range from his measurement of shell heights in these populations.

Give **two** other statistical values the student could calculate from his measurement of shell heights in these populations.

[1 mark]

1 _____

2 _____

0 1 . 3

Name the taxon in the hierarchy of classification represented by:

[1 mark]

1 *Littorina* _____

2 *littorea* _____

0	1	.	4
---	---	---	---

The student noticed there was a difference in shell height between these populations of snails. He wanted to investigate if the difference was significant.

Give a suitable null hypothesis to use in his investigation and name the statistical test to use with these data.

[2 marks]

Null hypothesis _____

Statistical test _____
