

- 8** Reforestation is an example of effective management of conflicts between human needs and conservation.

Organisations have put together a list of rules for responsible reforestation. These rules aim to improve absorbing and storing atmospheric carbon dioxide, biodiversity and human livelihoods.

Four of the rules are:

1. Protect existing forests first
2. Work together with local people
3. Select appropriate areas for reforestation
4. Select species to maximise biodiversity.

- (a) Explain the importance of protecting existing forests first (rule 1).

(2)

- (b) Suggest why it is important that organisations involved in reforestation work with the local people (rule 2).

(2)

(c) Explain **two** reasons why previously forested areas should be selected for reforestation instead of other wild areas (rule 3).

(4)

(d) Explain why a mixture of native species, including endangered and genetically diverse species, should be introduced (rule 4).
