

21 The photomicrograph shows cells at different stages of mitosis.

A student wrote four statements about the photomicrograph.

- 1 Cell P shows anaphase.
- 2 Spindle formation is occurring in cell Q.
- 3 The amount of DNA in cell R is the same as in cell T.
- 4 The correct order for the stages is $S \rightarrow R \rightarrow T \rightarrow P \rightarrow Q$.

Which statements are correct?

- A** 1, 2 and 3 **B** 1, 2 and 4 **C** 1, 3 and 4 **D** 2, 3 and 4
