

**15** Which statements about phospholipids in cell surface membranes are correct?

- 1 Fatty acid tails allow most ions to pass through the membrane.
- 2 Hydrophobic tails point inwards facing each other.
- 3 All polar heads face the cytoplasm.
- 4 The phospholipids help with the flexibility of the membrane.

**A** 1, 2 and 3      **B** 1 and 3 only      **C** 2, 3 and 4      **D** 2 and 4 only
