

Question number	Answer	Additional guidance	Mark
2(a)(i)	A cortex		Computer (1)

Question number	Answer	Additional guidance	Mark
2(a)(ii)	A W		Computer (1)

Question number	Answer	Additional guidance	Mark
2(a)(iii)	C Y only		Computer (1)

Question number	Answer	Additional guidance	Mark
2(b)	An answer that includes the following points: • (urea) forced out by high pressure (of the blood) (1) • caused by afferent blood vessel greater diameter than efferent blood vessel in the glomerulus (1) • through pores in the (basement) membrane (1)	IGNORE any other mechanism other than ultrafiltration ALLOW arteriole NOT artery	Expert (2)

		ALLOW reference to podocytes /glomerular fenestrations	
--	--	--	--

Question number	Answer	Additional guidance	Mark
2(c)	An explanation that includes the following points: • less water available in deserts (1) • (Kangaroo rat conserves water) by producing more concentrated urine (1) • needs to actively transport more sodium ions into (the extracellular fluid of) medulla (1) • therefore needs more mitochondria to produce more ATP (1)	ALLOW Less water available for kangaroo rat ALLOW {more water reabsorbed / filtered out} producing more concentrated urine IGNORE sodium	Expert (3)
