

- 12** The Michaelis-Menten constant for an enzyme-catalysed reaction is referred to as K_m , and the maximum velocity of such a reaction is known as V_{max} .

Which statement about K_m and V_{max} is correct?

- A** An enzyme with a high value of K_m can reach its V_{max} at a low substrate concentration.
- B** An enzyme with a high value of K_m has a high affinity to its substrate.
- C** An enzyme with a low value of K_m can reach its V_{max} at a high substrate concentration.
- D** An enzyme with a low value of K_m has a high affinity to its substrate.
