

- 1 The Sulawesi macaque, *Macaca nigra*, is found on the large island of Sulawesi in Indonesia. The Sulawesi macaque is also found on other smaller islands close to Sulawesi, such as the island of Bacan.

Fig. 1.1 shows a Sulawesi macaque.

Fig. 1.1

- (a) The International Union for Conservation of Nature (IUCN) is the world's largest global environmental organisation. The IUCN Red List of Threatened Species™ evaluates the conservation status of plant and animal species. The Sulawesi macaque is categorised as critically endangered on the IUCN Red List.

Table 1.1 shows the numbers of humans and the numbers of Sulawesi macaques on Sulawesi and Bacan.

Table 1.1

island	area / km ²	number of humans	number of humans per km ²	number of macaques	number of macaques per km ²
Sulawesi	174 600	17 360 000	99.43	5200	
Bacan	1900	60 741	31.97	90 000	47.37

- (i) Calculate the number of macaques per km² for Sulawesi.

Write your answer in Table 1.1.

(ii) Comment on the data shown in Table 1.1 **and** suggest reasons for the pattern shown.
