

16 The diagram shows part of the cell surface membrane of an active animal cell.

Which statements correctly describe the net movement of molecules across this membrane?

- 1 Oxygen diffuses through molecules M from X to Y.
- 2 Carbon dioxide diffuses through molecules M from X to Y.
- 3 Water moves from Y to X through molecule L.

A 1, 2 and 3 **B** 1 and 2 only **C** 1 and 3 only **D** 2 and 3 only
