

Question number	Answer	Additional guidance	Mark
2(a)(i)	The correct answer is B <i>A is incorrect because the aorta takes blood away from the left hand side of the heart</i> <i>C is incorrect because pulmonary vein returns blood to the left hand side of the heart</i> <i>D is incorrect because the vena cava returns blood to the right atrium</i>		(1)

Question number	Answer	Additional guidance	Mark
2(a)(ii)	The correct answer is A <i>B is incorrect because stage F which is ventricular systole</i> <i>C is incorrect because F is ventricular systole</i> <i>D is incorrect because F is ventricular systole</i>		(1)

Question number	Answer	Additional guidance	Mark
2(b)(i)	- values read from the graph and subtracted to give the time for one heart beat (1) 75.0 (1)	0.8 / any pair of values that give 0.8 when subtracted DO NOT ACCEPT 75 ECF from mp 1 if values correspond to readings from graph Bald answer of 75.0 = 2 marks Bald answer of 75 = 1 mark	(2)

Question number	Answer	Additional guidance	Mark
2(b)(ii)	An answer that includes three of the following points: - graph will be {the same / similar in} {shape / position} (1) - because the left hand side and right hand side beat simultaneously (1) - peaks will be lower (1) - because pressure in right hand side is lower {as blood is only pumped to <u>lungs</u> / to prevent damage to <u>alveoli</u>} (1)	NB 'It' refers to the line for the right ventricle NB accept converse where appropriate ACCEPT line ACCEPT description e.g. both ventricles contract at the same time IGNORE graph lower down ACCEPT because right ventricle has {less muscle / thinner walls} as blood is only pumped to <u>lungs</u> less force to <u>lungs</u> NB If candidate says that there is something drawn on the graph you must send it to review	(3)
