

40 A student wrote the following statements about the production of monoclonal antibodies.

Which statement is **not** correct?

- A** Non-self antigen is injected into a mammal.
- B** Plasma cells secrete the specific antibody in response to a non-self antigen.
- C** Selected hybridoma cells divide by mitosis to form a clone.
- D** T-lymphocytes are fused with cancer cells to form hybridoma cells.

Permission to reproduce items where third-party owned material protected by copyright is included has been sought and cleared where possible. Every reasonable effort has been made by the publisher (UCLES) to trace copyright holders, but if any items requiring clearance have unwittingly been included, the publisher will be pleased to make amends at the earliest possible opportunity.

To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced online in the Cambridge Assessment International Education Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download at www.cambridgeinternational.org after the live examination series.

Cambridge Assessment International Education is part of Cambridge Assessment. Cambridge Assessment is the brand name of the University of Cambridge Local Examinations Syndicate (UCLES), which is a department of the University of Cambridge.
