

- 26** Different substances, such as sucrose and amino acids, can move in different directions in the phloem sieve tube elements.

Which statement explains this?

- A** Active transport occurs in some phloem sieve tube elements and mass flow occurs in other sieve tube elements.
- B** Both active transport and mass flow occur in each individual phloem sieve tube element.
- C** Mass flow occurs in both directions at the same time in each individual phloem sieve tube element.
- D** Mass flow occurs in different directions in different phloem sieve tube elements at the same time.
