

**22** How many statements are true for semi-conservative replication of DNA in a prokaryotic cell?

- 1 the process takes place in the cytoplasm
- 2 an adenine nucleotide will line up against a uracil on the template strand
- 3 each new DNA molecule will contain one strand from the parent molecule
- 4 if the parent molecule contained 40% guanine nucleotides each new DNA molecule will contain 20% guanine nucleotides

**A** 1

**B** 2

**C** 3

**D** 4
