

Question	Marking Guidance	Mark	Comments
10.1	1. Vaccine contains antigen from pathogen; 2. Macrophage presents antigen on its surface; 3. T cell with complementary receptor protein binds to antigen; 4. T cell stimulates B cell; 5. (With) complementary antibody on its surface; 6. B cell secretes large amounts of antibody; 7. B cell divides to form clone all secreting/producing same antibody;	5 max	
10.2	1. Active involves memory cells, passive does not; 2. Active involves production of antibody by plasma cells/memory cells; 3. Passive involves antibody introduced into body from outside/named source; 4. Active long term, because antibody produced in response to antigen; 5. Passive short term, because antibody (given) is broken down; 6. Active (can) take time to develop/work, passive fast acting;	5 max
