

- 24** A dendrograph records changes in the diameter of a tree. The diagram shows a dendrograph fixed to a tree.

Some results are shown on the chart recording.

What explains the diameter changes recorded during the day and night?

- A** Adhesion forces decrease during the night.
- B** Cohesive tension forces increase during the day.
- C** Mass flow of sucrose increases during the night.
- D** Root pressure decreases during the day.
