

1(a)	any one correct location ; R if more than one label line and one is to an incorrect location <i>allow the mark if more than one label line and <u>all</u> point to xylem locations</i> 	1
1(b)	I ref. to adhesion / H bonding between water molecules and cellulose lining <i>any three from</i> (hydrogen bonding causes) <u>cohesion</u> between water molecules ; water molecules attracted to each other /AW ; water leaving xylem (at top), pulls water molecules below ; transpiration pull ; <i>idea that</i> contributes to, an unbroken / a continuous, column of water (within xylem vessels) ; AVP ; e.g. allows movement of water against (pull of) gravity	3

Question	Answer	Marks
1(c)(i)	<i>any three from</i> <i>description max 2</i> (movement to adjacent cell) via plasmodesmata ; (movement) through symplasm / cytoplasm / symplastic pathway / cytoplasmic pathway ; (includes) movement through vacuole / vacuolar pathway ; <i>explanation</i> cell B has a lower water potential than A ora <i>or</i> cell C has a lower water potential than B ; ora <i>or</i> water moves down the water potential gradient / from high to low water potential / to lower water potential / from less negative to more negative water potential ; R from high to low water potential gradient R to lower water potential gradient water moves, into / out of, vacuole by osmosis <i>or</i> water crosses tonoplast by osmosis ;	3
1(c)(ii)	<i>any three from</i> cell wall ; large (permanent) vacuole ; tonoplast ; plasmodesmata / cytoplasmic strands between adjacent cells ; nucleus at, edge / periphery, of cell / AW ; AVP ; many small Golgi bodies A dictyosomes starch, granules / grains I lack of centrioles I chloroplasts	3
