

1(a)	<i>macromolecule</i> (both are) large / AW, molecules / size / (molecular) mass ; A composed of, many / AW, atoms I composed of more than one molecule <i>polymer</i> composed of, many / three or more / more than two / repeated / repeating, subunits / units / monomers / residues / alpha glucose ; A many of the same / similar / chain of ... <i>for repeated</i> I molecules	2
1(b)(i)	1 α- / alpha-, glucose molecule on left with –OH on C1 facing downwards ; 2 α- / alpha-, glucose molecule on right with –OH on C4 facing downwards ; ecf if a single same mistake is made in both, e.g. no –H on C5 3 involvement of water ; must be above or alongside arrow R if below	3
1(b)(ii)	glycosidic ; A glucosidic I incorrect detail of the bond, e.g. β- / beta- / α- / alpha-, 1, 6	1
1(b)(iii)	hydrolysis ;	1
