

Answer ALL questions.

Write your answers in the spaces provided.

Some questions must be answered with a cross $\boxtimes$. If you change your mind about an answer, put a line through the box $\boxtimes$ and then mark your new answer with a cross $\boxtimes$.

- 1** Red blood cells transport oxygen to the cells of the body.

Read through the following description of how oxygen is transported from the lungs to respiring cells.

Complete the description by writing the most appropriate word or words on the dotted lines.

Oxygen binds to inside red blood cells.

Oxygen binds to this molecule in the lungs where the partial pressure of oxygen is compared with elsewhere in the body.

The oxygenated blood returns to the heart in the blood vessel called the and is pumped to the body by the part of the heart called the

In the tissues, the ability of this molecule to bind oxygen is affected by the higher concentration of carbon dioxide.

This is called the effect.
