

17 The diagram shows the mean dimensions of an epithelial cell in micrometres (μm).

Which row shows the surface area to volume ratio of the epithelial cell and how the surface area to volume ratio of the cell would change if the cell width doubled?

	surface area : volume	how surface area : volume changes if the cell width doubled
A	12 : 23	decreases
B	12 : 23	increases
C	23 : 12	decreases
D	23 : 12	increases
