

Question	Marking Guidance	Mark	Comments
02.1	Stomata per mm ² or cm ² OR Number per mm ² or cm ² ;	1	Accept: mm ⁻² or cm ⁻² . Reject: per μm ² or μm ⁻² . Reject: the use of a solidus / as being equivalent to per. Ignore: 'amount'.
02.2	1. Single/few layer(s) of cells; 2. So light can pass through;	2	1. Accept: more/too many/overlapping. 1. 'single layer' without reference to cells/tissue should not be credited.
02.3	1. Distribution may not be uniform OR So it is a representative sample; 2. To obtain a (reliable) mean;	2	1. Accept: more/fewer stomata in different areas 1. Ignore: anomalies/random/bias 2. Accept: 'average'.
02.4	1. Hairs so 'trap' water vapour and water potential gradient decreased; 2. Stomata in pits/grooves so 'trap' water vapour and water potential gradient decreased; 3. Thick (cuticle/waxy) layer so increases diffusion distance; 4. Waxy layer/cuticle so reduces evaporation/transpiration. 5. Rolled/folded/curled leaves so 'trap' water vapour and water potential gradient decreased; 6. Spines/needles so reduces surface area to volume ratio;	2 max	1, 2 and 5. Accept: humid/moist air as 'water vapour' but not water/moisture on its own. 1, 2 and 5. Accept: diffusion gradient as equivalent to water potential gradient. 1, 2 and 5. Accept: less exposed to air as an alternative to water potential gradient. 6. Accept: spines/needles so 'reduce area'.

02.5	1. Water used for support/turgidity; 2. Water used in photosynthesis; 3. Water used in hydrolysis; 4. Water produced during respiration;	2 max
