

2	<i>any seven from:</i> 1 (random) mutation ; 2 directional selection ; 3 antibiotic acts as selection pressure / AW ; 4 bacteria with, mutation / gene / allele, (that codes for antibiotic resistance), have selective advantage ; 5 (so) survive / reproduce ; 6 <i>ref.</i> binary fission / asexual reproduction / vertical transmission ; 7 <i>ref.</i> transduction / transformation / conjugation / horizontal transmission ; I sexual reproduction 8 (resistance) allele frequency increases / gives rise to a population of resistant bacteria ; 9 fast (evolution) due to short generation time ; 10 increased chance of resistance if people do not finish full course of antibiotics / overuse of antibiotics ; 11 AVP ; e.g. some antibiotics may act as mutagens e.g. enzymes that break down the antibiotic	7
