

- 26** In an investigation, a leafy shoot was attached to a potometer and exposed to a variety of conditions. The time taken for the meniscus to move 50 mm along the capillary tubing was recorded for each set of conditions.

temperature /°C	humidity	air movement	time taken to move 50 mm /s
20	dry	not moving	125
20	dry	moving	71
30	dry	not moving	40
20	humid	not moving	166
20	humid	moving	83
30	humid	not moving	55

Which row shows the slowest and fastest rates of water uptake for this investigation?

	slowest rate /mm s ⁻¹	fastest rate /mm s ⁻¹
A	0.3	1.3
B	0.3	3.3
C	3.3	0.3
D	1.3	0.8
