

6(a)	capsid ; A capsomere or protein coat R protein / glycoprotein / capsid	1
6(b)	<i>accept accounts based on primary and / or secondary immune response .</i> fewer cytokines released ; <i>and any two from:</i> fewer plasma cells, so fewer antibodies produced ; A B lymphocytes fewer macrophages stimulated / less production of ‘angry’ macrophages / AW / less antigen presentation by macrophages ; fewer T-killer cells stimulated to divide / less T-killer cells / less infected cells killed (by T-killer cells) ; fewer memory cells (produced by the primary response) ; AVP ;	3
6(c)	virus cannot enter the T-helper cell / CCR5 unable to trigger endocytosis of viral particle ;	1
6(d)	<i>any three from:</i> 1 (named) small mammal, injected / AW, with CCR5 ; A antigen 2 immune response occurs (over several weeks) ; A immune response described 3 plasma cells / B-lymphocytes / B-cells / splenocytes, extracted from spleen ; 4 plasma cells / B-lymphocytes / B-cells, fused with, myeloma / tumour / cancer / AW, cells (to form hybridomas) ; 5 screening / selection / AW, for hybridomas producing desired, (monoclonal) antibodies ; 6 AVP ; e.g. hybridoma cells separated (into wells) to produce clones ref. to large scale production	3
