

Question	Marking Guidance	Mark	Comments
01.1	Carboxyl;	1	Accept carboxylic acid
Question	Marking Guidance	Mark	Comments
01.2	Type of R group 1. Unsaturated (fatty acid/hydrocarbon); Explanation 2. Double bond (between carbons);	2	1. Accept alkene 2. Accept for 'double bond', C=C
Question	Marking Guidance	Mark	Comments
01.3	1. Add ethanol/alcohol then add water and shake/mix OR Add ethanol/alcohol and shake/mix then pour into/add water; 2. White/milky (emulsion) OR (emulsion) test turns white/milky;	2	1. Reject heating the emulsion test 1. Accept 'Add Sudan III and mix' 1. Ignore a second shake 2. Ignore cloudy 2. Reject precipitate 2. Accept (for Sudan III) top (layer) red

Question	Marking Guidance	Mark	Comments
01.4	(Similarity) 1. Both have a phospholipid bilayer OR Both have fatty acid/hydrophobic tails pointing in/face each other OR Both have phosphate/polar/hydrophilic heads pointing out OR Both have protein; (Differences) 2. No channel/carrier proteins, whereas fluid mosaic does OR Protein layer outside (phospholipids), fluid mosaic is 'dotted'; 3. Cholesterol is not present whereas it is present in fluid mosaic; 4. Glycoprotein is not present whereas it is present in fluid mosaic; 5. Glycolipid is not present whereas it is present in fluid mosaic;	3 max	Accept 2 marks max if 1. is not achieved 2., 3., 4., and 5. accept first answer refers to 1935 model unless otherwise stated 2. Accept for 'no channel/carrier', no intrinsic 2. Accept only one type of protein whereas fluid mosaic has many (types)
