

Question	Marking Guidance	Mark	Comments
03.1	(Simple) diffusion;	1	Reject: facilitated diffusion.
03.2	1. Thin/small so short diffusion pathway; 2. Flat/long/small/thin so large surface area to volume ratio/surface area : volume;	2	1. Reject: thin membrane/wall/cells. 2. Accept: small volume to surface area ratio.
03.3	1. High/50% saturation (with oxygen) below (pO_2 of) 0.2 kPa; 2. (Oxygen) for respiration;	2	1. Accept: fully saturated or above 50% saturation below 0.2kPa. 1. Accept: any number between 0.08 and 0.2 kPa
03.4	1. Water potential <u>higher</u> in worm OR Lower <u>water</u> potential in seawater; 2. Water leaves by <u>osmosis</u> (and worm dies);	2	1. Accept: correct reference to water potential gradient if direction of water movement is given. 1. Accept: Ψ for water potential. 2. Reject: worm/cells burst.
