

4 Lysosomes vary in shape and size, making them difficult to identify.

What describes a lysosome?

- A** a vesicle containing enzymes, enclosed by a double membrane, that is budded off the endoplasmic reticulum
- B** a vesicle containing hydrolytic enzymes and surrounded by a single membrane, found only in phagocytes
- C** a vesicle enclosed by a single membrane, containing several different hydrolytic enzymes that may act inside or outside the cell
- D** a vesicle surrounded by a double membrane, containing enzymes which can hydrolyse damaged organelles in a cell
