

10(a)	any seven from: 1 adrenaline, binds / joins, to receptor ; 2 on (cell surface) membrane of liver cells ; 3 activates / stimulates, <u>G protein</u> ; 4 activates / stimulates, adenylyl cyclase ; 5 cyclic AMP made from ATP ; 6 (cAMP is) <u>second(ary) messenger</u> ; 7 (cAMP) activates / stimulates / binds to, <u>kinase</u> ; 8 <u>enzyme cascade</u> ; 9 amplifies signal ; 10 (activates) glycogen phosphorylase ;	7
10(b)	any eight from: 1 ABA is a stress hormone ; 2 ABA, released / produced / increases, during drought ; <i>in context of guard cell</i> 3 ABA binds to its receptor on (cell surface) membrane ; 4 stops, H^+ / H ions / protons, leaving (guard cell cytoplasm) ; 5 Ca^{2+} enters ; 6 Ca^{2+} is a <u>second(ary) messenger</u> ; 7 (Ca^{2+} / Cl^- / K^+) channel (proteins) open ; 8 Cl^- / anions, leave ; 9 K^+ leave ; 10 water potential (in cell) increases ; 11 water leaves by osmosis ; 12 volume of, cell / vacuole, decreases ; 13 cell becomes flaccid closing, stoma / pore ;	8
