

3 Cells of the immune system respond to the presence of non-self antigens.

(a) Outline the features of non-self antigens.

.....

.....

.....

.....

.....

.....

.....

..... [3]

(b) Four different types of cells of the immune system are shown in Table 3.1.

Complete Table 3.1:

- use a tick (✓) if the description applies to the named cell of the immune system
- use a cross (X) if the description does **not** apply.

Table 3.1

description of cell	cell of the immune system			
	B-lymphocyte	plasma cell	T-helper cell	T-killer cell
able to go through a number of cell cycles (clonal expansion)				
main role is to secrete cytokine during an immune response				
present during a primary immune response to a virus				

[4]

(c) The cell cycle can be divided into different parts.

Complete sentences **A**, **B** and **C** to provide more information about the mitotic cell cycle.

A The part of the cell cycle that occurs immediately after mitosis is

.....

B The part of the cell cycle in which the S phase occurs is

.....

C The main event that occurs during the S phase is

.....
