

- 67** A student investigated the rate of oxygen bubble release from a pondweed plant at different temperatures. The rates are shown below, with two sections of the graph marked X and Y. In each investigation all other factors were kept constant.

Which of the following statements about sections X and Y is/are correct?

- 1** In section X, the kinetic energy of the reaction molecules is increasing with increasing temperature.
 - 2** In section Y, temperature is the factor which limits that rate of oxygen production.
 - 3** In section Y, the plant's enzymes may have denatured.
 - 4** Section Y represents the plant's maximum possible rate of oxygen production under any conditions.
- A** 1 only
- B** 2 only
- C** 3 only
- D** 4 only
- E** 1 and 2 only
- F** 1 and 4 only
- G** 2 and 3 only
- H** 3 and 4 only
