

2 Which statements about light microscopy are always correct?

- 1 The greater the resolution of a light microscope, the greater the detail that can be seen.
- 2 The greater the magnification of a light microscope, the greater the detail that can be seen.
- 3 Increasing the magnification of a light microscope up to its limit of resolution allows more detail to be seen.
- 4 The shorter the wavelength of light used in a light microscope, the greater the detail that can be seen.

- A** 1, 2, 3 and 4
- B** 1, 3 and 4 only
- C** 1 and 2 only
- D** 4 only
