

25 The table shows all the possible DNA triplet codes for some amino acids.

amino acid	DNA triplet code
cysteine	ACA
cysteine	ACG
tryptophan	ACC
isoleucine	TAA
isoleucine	TAG
isoleucine	TAT
methionine	TAC

The amino acid sequence is shown.

methionine – isoleucine – cysteine – tryptophan

What is the maximum number of different DNA sequences that could produce this amino acid sequence?

A 1

B 4

C 6

D 7
