

- 34** A person with no breathing conditions rests for an hour. Their breathing in this time is shallow and slow, so little air from outside the body reaches the alveoli. The person's heart rate remains constant.

Which statement is correct?

- A** The carbon dioxide concentration in the blood in the pulmonary vein will be higher than in the pulmonary artery.
- B** Carbon dioxide molecules in the air of the alveoli move out of the blood by active transport.
- C** The air in the alveoli has a lower concentration of oxygen than the blood in the pulmonary vein.
- D** Oxygen molecules diffuse from the air in the alveoli into the blood at a slower rate than when the person is active.
