

1(a)	A oxygen ; B ethanol ; C aerenchyma ;	3												
1(b)	ref. to ethanol dehydrogenase (to break it down) ; A alcohol dehydrogenase	1												
1(c)(i)	as gibberellin concentration increases, the length of stem increases or positive correlation between concentration of gibberellin and length of stem ; data quote – two concentrations and two lengths with units ; <table><tr><td>conc gibberellin / au</td><td>length of stem / mm ± 0.5 mm</td></tr><tr><td>1</td><td>3</td></tr><tr><td>2</td><td>19</td></tr><tr><td>3</td><td>27</td></tr><tr><td>4</td><td>45</td></tr><tr><td>5</td><td>52</td></tr></table>	conc gibberellin / au	length of stem / mm ± 0.5 mm	1	3	2	19	3	27	4	45	5	52	2
conc gibberellin / au	length of stem / mm ± 0.5 mm													
1	3													
2	19													
3	27													
4	45													
5	52													

Question	Answer	Marks
1(c)(ii)	any three from : 1 ethylene causes break down of ABA, so gibberellin, active / stimulated / functional ; 2 plants grow tall(er) / stems increase in length / stem elongation / increase in internodal length ; 3 (so) leaves / flowers, held above the water ; 4 (so) photosynthesis can occur / increased access to light / AW or (so) gas exchange / reproduction, can occur ;	3
