

40 Why has it proved difficult to develop an effective vaccine against malaria?

- A** Mosquitoes have many stages in their life cycles.
- B** The human immune system does not recognise the antigens of the parasite.
- C** The parasites can only be attacked when outside the liver cells and red blood cells.
- D** Vaccines are rapidly broken down by proteases in the stomach.

Permission to reproduce items where third-party owned material protected by copyright is included has been sought and cleared where possible. Every reasonable effort has been made by the publisher (UCLES) to trace copyright holders, but if any items requiring clearance have unwittingly been included, the publisher will be pleased to make amends at the earliest possible opportunity.

To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced online in the Cambridge International Examinations Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download at www.cie.org.uk after the live examination series.
