

- 63** A student set up an experiment to measure the rate of photosynthesis, as shown in the diagram.

Data was collected and plotted on a graph.

If plotted, which of the following variables would give a gradient that is directly proportional to the rate of photosynthesis?

(All other variables were kept constant.)

	<i>x-axis</i>	<i>y-axis</i>
1	time	volume of CO ₂ released
2	time	number of gas bubbles released per minute
3	volume of oxygen released	time

- A** none of them
- B** 1 only
- C** 2 only
- D** 3 only
- E** 1 and 2 only
- F** 1 and 3 only
- G** 2 and 3 only
- H** 1, 2 and 3
