

37 Some of the processes which result in the formation of a population of bacteria that are resistant to a new antibiotic are listed.

- 1 change in reproductive success of bacteria
- 2 increase in frequency of the resistance allele in the population
- 3 increase in genetic variation within the population
- 4 random mutation occurs in bacterial DNA

What is the correct order of these processes?

- A** 1 → 3 → 2 → 4
- B** 2 → 1 → 3 → 4
- C** 3 → 4 → 1 → 2
- D** 4 → 3 → 1 → 2
