

Question number	Answer	Additional guidance	Mark
5(a)	An explanation that includes the following points: - because the rate of miscarriage increases with (increase in) age (1) - there is no evidence age is causing the miscarriage (1)	ACCEPT directly proportional to each other it shows that an increase in one variable is reflected by an increase in the other variable ACCEPT no evidence of causation	(2)

Question number	Answer	Additional guidance	Mark
5(b)(i)	An explanation that includes the following points: - aneuploidy results in miscarriage because the screened embryos result in fewer miscarriages (1) - other {factors / named factor} cause miscarriages because {screened embryos / embryos that do not have aneuploidy} are miscarried (1)	ACCEPT converse where appropriate e.g. age, mutations, the process of implanting embryos, smoking, alcohol, dietary factors IGNORE lifestyle / screening causes miscarriage	(2)

Question number	Answer	Additional guidance	Mark
5(b)(ii)	An explanation that includes three of the following points: - because no indication of sample size (1) - because no statistics presented (1) - because no idea how many of the unscreened embryos had aneuploidy (1) - other {lifestyles / factors / named factor} not {taken into account / not shown} (1) - false (negative / positive) results (1)	ACCEPT small sample size IGNORE age / sex	(3)

Question number	Answer	Additional guidance	Mark
5(c)	An answer that includes three of the following points: • (preimplantation) screened embryos still result in miscarriages so raising false hopes (1) • issues surrounding the embryos (that have aneuploidy) (1) • false (positive) results resulting in unnecessary {wastage / destruction} of embryos (1) • other (genetic) defects may be found (1)	DO NOT ACCEPT {fetus / baby} e.g. discarding the embryos is unethical ACCEPT false (negative) result leads to use of that embryo	(3)
