

Question	Marking Guidance	Mark	Comments
05.1	Hydrolysis (reaction);	1	
05.2	1. (Phosphate required) to make RNA; 2. (Phosphate required) to make DNA; 3. (Phosphate required) to make ATP/ADP; 4. (Phosphate required) to make membranes; 5. (Phosphates required) for phosphorylation;	2 max	1 and 2. If neither DNA or RNA are named allow one mark for nucleotide/nucleic acid/phosphodiester bonds/sugar-phosphate backbone. 4. Ignore: phospholipids without reference to membranes. Accept: as additional mark points any named biological molecule containing phosphate e.g. NADP, AMP, RuBP.
05.3	Accept answer in range from 3.7 : 1 to 4.1 : 1;	1	Reject any ratio not : 1.
05.4	1. Seeds/embryo remain dormant/inactive in winter/cold OR Growth/development of seed/embryo during winter/cold; 2. Seeds/plants develop in spring/summer OR Seeds/plants develop when temperature/light increases; 3. Plant photosynthesise (in spring/when warm); 4. Produce (more) seeds/offspring in spring/growing season;	3 max	1. Ignore: hibernate. 1. Accept: 'seed survives winter/cold'. 1. Reject: plant develops or seed germinates during winter/cold. 2. Accept: seeds/plants develop when more light or when temperature is higher. 2. Accept: seed germinates/'sprouts' during spring/summer or when temp/light increases.
