- (a) Common wombats mark areas of their habitat to signal to other wombats of the same species that they are living there. These marked areas are called territories.

Common wombats produce cube-shaped faeces. It is thought that these cubes can be stacked to mark territory without rolling away.

- (i) Calculate the surface area:volume ratio of one cube with a length of 2.5 cm.

(2)

Answer

- (ii) State what is meant by the term **habitat**.

(1)

.....

.....

.....

(iii) State what is meant by the term **species**.

(1)

(b) The height of a wombat is a result of polygenic inheritance.

State what is meant by the term **polygenic inheritance** with reference to wombat height.

(1)

(c) Common wombats dig burrows to live in. They have adaptations to help them to do this successfully.

Describe **two** anatomical adaptations of a common wombat that help it to dig burrows to live in.

Use the information in the photograph to support your answer.
