

29 Which properties of lignin are important for the function of xylem vessels in the stem of a tall plant, such as a tree?

- 1 It is inflexible so does not bend easily.
- 2 It is not permeable to water.
- 3 It is strong to resist collapse under pressure.
- 4 It has weaker adhesion to water molecules than cellulose.

A 1, 2 and 3 **B** 1, 2 and 4 **C** 1, 3 and 4 **D** 2, 3 and 4
