

- 20** A student half filled a beaker with solution X. They placed a sealed Visking tubing bag containing solution Y into the beaker.

At 30 minutes, the solution in the beaker was orange and the solution inside the Visking tubing was blue-black.

What did solutions X and Y contain at the start to give these results?

	solution X	solution Y
A	starch	amylase and iodine
B	iodine	amylase
C	starch and amylase	iodine
D	iodine	starch
