

- 9** Which statement is a correct comparison between saturated triglyceride molecules and unsaturated triglyceride molecules of approximately the same molecular masses?
- A** Unsaturated triglycerides have more double bonds and fewer hydrogen atoms than saturated triglycerides.
 - B** Unsaturated triglycerides have fewer double bonds and fewer hydrogen atoms than saturated triglycerides.
 - C** Unsaturated triglycerides have more double bonds and more hydrogen atoms than saturated triglycerides.
 - D** Unsaturated triglycerides have fewer double bonds and more hydrogen atoms than saturated triglycerides.
