

- 12 The diagrams show the structures of two amino acids. One contains two amino ($-\text{NH}_2$) groups, labelled 1 and 2. The other contains two carboxylic ($-\text{COOH}$) groups, labelled 3 and 4.

A peptide bond is formed between the two amino acids.

Which groups form the peptide bond?

- A** 1 and 4 **B** 2 and 3 **C** 2 and 4 **D** 1 and 3
