

- 20** The table shows two stages of the mitotic cell cycle and structures that are found within typical plant cells.

Which row shows structures that are present during cytokinesis and  $G_1$  in plant cells?

|          | <b>cytokinesis</b> | <b><math>G_1</math></b> |
|----------|--------------------|-------------------------|
| <b>A</b> | centromeres        | telomeres               |
| <b>B</b> | centrioles         | nucleoli                |
| <b>C</b> | nucleoli           | sister chromatids       |
| <b>D</b> | sister chromatids  | nuclear envelope        |
