

30 Which statement explains why the ventricles contract after the atria?

- A** The band of fibres between the atria and the ventricles conducts the excitation wave slowly.
- B** The excitation wave has to pass through a small area of conducting fibres in the septum.
- C** The excitation wave has to travel further to reach the base of the ventricles than to spread across the atria.
- D** The excitation wave travels slowly through the Purkyne tissue to reach the base of the septum.
