

- 19** In an experiment, four different-sized cubes of colourless agar were placed into a blue dye. The time taken for each cube to turn blue was recorded.

Which row shows the surface area and volume of the cube that took the longest time to turn completely blue?

	surface area / cm ²	volume / cm ³
A	6.0	1
B	9.5	2
C	12.5	3
D	38.0	16
