

Question	Marking Guidance	Mark	Comments
09.1	1. Outside of virus has antigens/proteins; 2. With complementary shape to receptor/protein in membrane of cells; 3. (Receptor/protein) found only on membrane of nerve cells;	3	Accept converse argument
09.2	1. No more (nerve) cells infected/no more cold sores form; 2. (Because) virus is not replicating;	2	
09.3	Prevents replication of virus;	1	
09.4	MicroRNA binds to cell's mRNA (no mark) 1. (Binds) by specific base pairing; 2. (So) prevents mRNA being read by ribosomes; 3. (So) prevents translation/production of proteins; 4. (Proteins) that cause cell death;	4
